occasion of the great European thinker's eightieth birthday, 'is not only the world's most famous living philosopher. Even his fame is famous.' Now, after many years of intensive research and in-depth conversations with contemporaries, colleagues and Habermas himself, Stefan Müller-Doohm presents the first comprehensive biography of one of the most important public intellectuals of our time. From his political and philosophical awakening in West Germany to the formative relationships with Adorno and Horkheimer, Müller-Doohm masterfully traces the major forces that shaped Habermas's intellectual development. He shows how Habermas's life and work were conditioned by the possibilities offered to his generation in the

circumstances of regained freedom that characterized postwar Germany. And yet Habermas's career is fascinating precisely because it amounts to more than a corpus of scholarly work, however original and influential that may be. For here is someone who continually left the protective space of the university in order to assume the role of a participant in controversial public debates — from the significance of the Holocaust to the future of Europe — and in this way sought to influence the development of social and political life in an arena much broader than the academy. The significance and virtuosity of Habermas's many writings over the years are also fully and expertly documented, ranging from his early

work on the public

sphere to his more recent writings on communicative action, cosmopolitanism and the postnational condition. What emerges from this biography is a vivid portrait of one of the great public intellectuals of our time — a unique thinker who has made an immense and lasting philosophical contribution but who, when he perceives that society is not living up to its potential for creating free and just conditions for all, becomes one of its most rigorous and persistent critics.

vision for the contemporary church. Moving beyond a narrow focus on moral decision-making or social-issues sermons, Campbell argues that a particular ethic--nonviolent resistance--is inherent in the practice of preaching and shapes the moral life of the church. In the face of the powers, the fundamental ethical task of preaching involves building up the church as a community of resistance. Employing three dimensions of character ethics--vision, practices, and virtues--Campbell demonstrates the concrete ways in which preachers may undertake this task.

Furthermore, condensation of photo-oxidation products of BVOCs leads to formation of secondary organic aerosols with profound implications for the earth's solar radiation budget and climate. Trees represent the plant life form that most contributes to BVOC emissions, which gives global forests a unique role in regulating atmospheric chemistry. a presentation of new excavation results and new analyses of individual monuments. Many well-known theatres such as the one of Dionysos in Athens, and others at Dodone, Corinth, and Sikyon have been re-examined since their original publication, with stunning results. New research, presented in this volume, includes moreover less well known, or even newly found, ancient Greek theatres in Albania, Asia Minor, Cyprus, and Sicily. Further studies on the history of research, on regional theatrical developments, terminology, and function, as well as a perspective on Roman theatres built in Greek traditions make this volume a comprehensive volume of new research for expert scholars as well as for students and the interested public.

The Archaeology of Byzantine Anatolia

Philipp Niewohner 2017-03-17 This book accounts for the tumultuous period of the fifth to eleventh centuries from the Fall of Rome and the collapse of the Western Roman Empire through the breakup of the Eastern Roman Empire and loss of pan-Mediterranean rule, until the Turks arrived and seized Anatolia. The volume is divided into a dozen syntheses that each addresses an issue of intrigue for the archaeology of Anatolia, and two dozen case studies on single sites that exemplify its richness. Anatolia was the only major part of the Roman Empire that did not fall in late antiquity; it remained steadfast under Roman rule through the eleventh century. Its personal history stands to elucidate

emphatic impact of Roman administration in the wake of pan-Mediterranean collapse. Thanks to Byzantine archaeology, we now know that urban decline did not set in before the fifth century, after Anatolia had already be thoroughly Christianized in the course of the fourth century; we know now that urban decline, as it occurred from the fifth century onwards, was paired with rural prosperity, and an increase in the number, size, and quality of rural settlements and in rural population; that this ruralization was halted during the seventh to ninth centuries, when Anatolia was invaded first by the Persians, and then by the Arabs---and the population appears to have sought shelter behind new urban fortifications and in

Further, it elucidates that once the Arab threat had ended in the ninth century, this ruralization set in once more, and most cities seem to have been abandoned or reduced to villages during the ensuing time of seeming tranquility, whilst the countryside experienced renewed prosperity; that this trend was reversed yet again, when the Seljuk Turks appeared on the scene in the eleventh century, devastated the countryside and led to a revival and refortification of the former cities. This dynamic historical thread, traced across its extremes through the lens of Byzantine archaeology, speaks not only to the torrid narrative of Byzantine Anatolia, but to the enigmatic medievalization.

In Defense of a Liberal Education Fareed Zakaria
2015-03-30 CNN host and best-selling author Fareed Zakaria argues for a renewed commitment to the world's most valuable educational tradition. The liberal arts are under attack. The governors of Florida, Texas, and North Carolina have all pledged that they will not spend taxpayer money subsidizing the liberal arts, and they seem to have an unlikely ally in President Obama.

at a General Electric plant in early 2014, Obama remarked, "I promise you, folks can make a lot more, potentially, with skilled manufacturing or the trades than they might with an art history degree." These messages are hitting home: majors like English and history, once very popular and highly respected, are in steep decline. "I get it," writes Fareed Zakaria, recalling the atmosphere in India where he grew up, which was even more obsessed with getting a skills-based education. However, the CNN host and best-selling author explains why this widely held view is mistaken and shortsighted. Zakaria eloquently expounds on the virtues of a liberal arts education—how to write clearly, how to express yourself convincingly,

and how to think analytically. He turns our leaders' vocational argument on its head. American routine manufacturing jobs continue to get automated or outsourced, and specific vocational knowledge is often outdated within a few years. Engineering is a great profession, but key value-added skills you will also need are creativity, lateral thinking, design, communication, storytelling, and, more than anything, the ability to continually learn and enjoy learning—precisely the gifts of a liberal education. Zakaria argues that technology is transforming education, opening up access to the best courses and classes in a vast variety of subjects for millions around the world. We are at the dawn of the great

The Place of Narrative

Marilyn Aronberg Lavin
1990-12-15 Looking at more than two hundred Italian medieval and Renaissance mural cycles, Lavin examines—with the aid of computer technology—the "rearranged" chronologies of familiar religious stories found therein. "Like many masterpieces, Lavin's book builds upon a simple idea . . . it is possible to do a computer analysis of . . . visual narratives. . . This is the first computer-based study of the visual arts of which I am aware that illustrates how those technologies can utterly transform the study of old master art. An extremely important book, one likely to become the most

[and] novel terminology to describe the disposition of scenes of church and chapel walls. . . . We should recognize this as a book of high seriousness which reaches out into new areas and which will fruitfully stimulate much thought on a neglected subject of very considerable significance."—Julian Gardner, Burlington Magazine

John off-limits for all quests for the historical Jesus. That stance, however, creates a new set of problems that need to be addressed thoughtfully. The essays in this book, reflecting the ongoing deliberations of an international group of Johannine and Jesus scholars, critically assess two primary assumptions of the prevalent view: the dehistoricization of John and the de-Johannification of Jesus. The approaches taken here are diverse, including cognitive-critical developments of Johannine memory, distinctive characteristics of the Johannine witness, new historicism, Johannine-Synoptic relations, and fresh analyses of Johannine traditional development. In addition to offering state-of-

flourishing literature on biblical theology. In recent years, Barr writes in the Preface, I have come to believe that one of the greatest dangers to sound and adequate interpretation of the Bible comes from the prevailing use of procedure which, while claiming to rest upon a knowledge of the Israelite and Greek ways of thinking, constantly mishandles and distorts the linguistic evidence of the Hebrew and Greek languages as they are used in the Bible. The increasing sense of dependence upon the Bible in the modern church only makes this danger more serious. The fact that these procedures have never to my knowledge been collected, analysed, and criticized in detail was the chief stimulus to my undertaking of this task myself. His conclusions
